The Hon. W. H. SEWARD when speaking here upon this subject treated it in this broad way. He views would no doubt be appreciated in China looked upon the advent of cheap Chinese labour to the United States simply as a commercial fact; to be regulated by supply and | best. demand, just as any other matter of commerce is regulated. Of the justice of this view, there can be very little doubt. In a country being taken to provide a suitable Scamen's seventeen guns from Fort Canning, the at whose efforts on behalf of sericulture I alludlike the United States cheap labour is a distinct addition to its wealth, as it becomes the great means of developing resources which otherwise must remain for a lengthened period useless. The remedy for any for the year 1870 .- The return show a gross exceptional over supply of this nature will be found in the working of two elements, which are certain to follow the introduction of cheap labour in the course of time-first the means of spreading that labour throughout the country; and, secondly a reciprocity as to the right of labouring between China and foreign nations. No more forcible instance of the former principle could be found than the Pacific Railway. FRESH NEWS OF DR. LIVINGSTONE Sir.-I heartily rejoice to announce to the public that I have this morning received a letter from Dr. Kirk, at Zanzibar, dated the th of December, 1870, which has relieved mefrom all anxiety respecting the fate of my illustrious friend Livingstone.

Dr. Kirk had just received a letter from the great Arab Sheik Said, of Uny-amyembe, dated 6 Rahes el Arbar, which, being translated, is to this effect:-" After compliments, your honoured letter has reached, and your friend has understood it. The residences of the nobility Favre has requested a safe conduct to enable and of the rich are called palaces, and so are some public buildings, such as " the P.lace of the Cortes," the Palace of the Senate," &c. The after tenor of Senor Barcia's article pro ves this to have been but a random remark, for he confesses his atter inability-to divine who the authors were, or even how many assessing they employed. He counts the six who fired and the three who struck the telegraphic matches as nine, but he adds that possibly there were others in all the different roads Prim night have taken to reach his house. It is singular that Prim never once directed his coachman to vary his route, and the coachman. a poor, simple-hearted, stupid soul, never once thought that his master's safety would be better ensured by going to and from the Cortes now and then by a different way, although from the relative position of the two buildings, the Ministry of War and the Cories, he could have gone seven or eight different ways, and none of them many minutes in excess of the Calle Ture , route, which is the shortest cat. Day after day and night after night he chose that narrow street, which is not seven

yards in width. The amassins know he would pass there that fatal night, and they took their measures accordingly. Senor Barcia is very angry with the police, and well he may be. He says it seems as if they were all dead that night. Did they think the "Partida de la Porra" were work that night, as at the assault on public actors in the Calderon Thactre, or the assault on public men of the Opposition in the public streets, or the assassination of Azcarraga? On all these occasions the police were absent, and on some of them it has since been proved they were absent "by order." He falls into great abuse of the Government of the Regent, and says the responsibility weighing over it is great. I must confess that the absence of the police from that street corner long enough to allow these six ruffians to stop General Prim's carriage, fire into it, and then escape scot free, reflects fearful discredit on them. The Calle Turco is narrow, and not much traversed at night, but the deed was done at its juncture with the Calle Alcala, which is the main street of Madrid, longer and wider than the Strand. How it was that, in A Deputy of the Republican minority, Senor | response to the noise of the discharge of six Roque Barcin, has published an extraordinary blunderbusses, no police rushed to the scene.

Few men on-thi to Canton merchant. dispose absolutely of what they possess, unless it be self-acquired. All the relations of life are hased on the principle of interdependenco-all classes, ranks, and individuals are bound each to each by mutual duties. The land is worked by a combination of the labouring man, the farmer, and the landlord. Each of them is judispensible to the other. The labourer draws his wages independent of the variations of prices and seasons; the farmer is enabled to farm 300 acres with his capital, which would not purchase thirty acres of his own; the landlord is the chief capitalist, who in the long run bears the main risk of the adventure. He has his duties to his tenants, duties to his family, duties to the public. The public funds, and all sorts of securities, are beld to an immense amount in trust under family settlements, by which the immediate interest and power of the individual are checked and cir cumscribed by the interests and rights of others. This mutual dependence, which exists with reference to property and its use, runs through every branch of English social life; it is the basis of our credit; it is the secret of our enormous power of association : it is the breath of public life, for it begets a sense of duty to others on the one hand, and a sence of reliance on others on the other hand. All this is reversed by the laws, manners, and social institutions of modern France. The Code Civil prohibits all the varied form of limitsbut one form of property which gives the absolute disposal of it. No man holds anything. WITH THE PUNTI AND MANDARIN PRONUNCIATION. in Anglo-Chinese Digrionary, by the Rev W. LOBSCHEID, published at the Daily Press Office, Hongkong.

FOR scope and practical service this Work stands unrivalled. All the new words which the Chinese baye of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extense. Each and every word is fully illustrated and explained, forming exer-cises for students of a most instructive nature. Both the Court and Punti pronunciations are given, the accents being carefully marked on the best principle hitherto attained. The typo-Wanchai, from 12 to 30,000 piouls caps. graphy displays the success of an attempt to city. Apply to n the size of body, thereby effecting a vast sconomy of apace, achieving a clearness not previously attained, and dispensing with those vast margins and vocant spaces which have heretofore characterized Chinese publications. The scope of the work is so great, and its ntilitarian purposes so complete, that a re-forence to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chi-Ohina, and to the natives thomselves it to plains subjects fully, with which very fer indeed of them are perfectly acquainted parties resident in England and interested in Ohina it cannot but be invaluable occasionally

Love at *ight. Scarcely less remarkable is a marriage which Hornoe Walpole, in a letter to George Montagu, of the 3rd September, 1749, mentions as having taken place at Keith's Chapel. "Did von know," he writes, a "young fellow that was called bandsome Tracy?" He was walking in the Park with some of his acquaintance, and overtook three girls. One was very pretty. They followed them, but the girls ran away, and the company grew tired of pursuing them; all but Tracy. He followed them to Whitehallgate, where he gave a porter a crown to dog them. The porter hunted them; he the porter. The girls ran all round Westminster and "back to the Haymarket, where the porter came up with them. He told the protty one she must go with him, and kept her talking till Tracy arrived quite out of breath, and exceedingly in love. He insisted on knowing where she lived, which she refused to tell him; and, after much dispiting, went to the house of one of her companions, and Tracy with them. He there made ber discover her family, a butterwoman in Cravenstreet, and engaged ber to meet him the next morning in the Park; but before night he wrote her four love-letters, and in the last offered two hundred pounds a year to her and a hundred a year to Signorn la Madre. Griselda made a confidence to a staymaker's wife, who told her that the swain was certainly in love enough to marry her if she could determine to be virtuous and refuse his offers. Ay, says she, but if I should, and should lose him by it?' However, the measures of the cabinet council were decided for virtue, and when she met Tracy the next morning in the Park, she was convoyed by her mister and brother-in-law, and stuck close to the letter of her reputation. She would to nothing. She would go nowhere. At last, as an instance of prodigious compliance, she told him that if he would accept such a dinner as a butterwoman's daughter could give him he should be welcome. Away they walked to Craven-street. The mother borrowed some silver to buy a leg of mutton, and they kept the enger lover drinking till twelve at night, when, with a chosen com-mittee, the faithful pair waited on the minister of May Fair. The Doctor was in bed, and wore he would not get up to narry the King, J. Hencage Jesse.

Dynastie Weakness. When the succession to the supreme power depends on a popular vote, a legislative preference, or a revolution, the dynastic question is continually paramout to every other consi--deration in the mind of the ruler. His object is to transmit or perpetuate his power, and to this object the whole policy of his reign is subservient. At any moment the change may occur. At any moment he or his being must be prepared to meet it.
